

Weight 14kg

More Comfort -

The OGO™ guarantees the usual sitting and operating comfort of a plumbed toilet. Unlike other composting separating toilets, there is no need to add wood shavings/sawdust after each use. After using the toilet, you simply press a button to operate the agitator briefly and spray the toilet bowl with the Composting Toilet Cleaner /Stimulator - and you're done!

NO WATER

NO CHEMICALS

NO SMELL

100 % COMFORT

100 % ECO-FRIENDLY

Our Unique Features:

- Aesthetically pleasing & fits into the smallest of spaces.
- Totally Self Contained
- Automatic agitation of waste
- Separation of urine and solids
- No odour
- Easy to empty
- Urine tank completely hidden
- Simple Installation
- Vent hose can be easy adjusted to either side

Our Promise

We know that nothing is perfect, so we can continue to innovate, we are open to feedback for ways to improve. We hope that product satisfaction is met, and all your toilet needs are taken care-of!

Composting Toilet

The OGO™ Toilet is a waterless composting toilet designed to be the most aesthetic product that fits in the smallest of spaces.

Suitable for:

Caravans, Motor Homes, Camper Trailers, Boats, Tiny Homes & Sheds

WHO WE ARE -

EnviroPro Alternatives Pty Ltd is an Australian company who have specialised in the 100% environmentally sound treatment of waste for 25 years.

As EnviroPro's goal is to offer the best products available in the composting toilet market they have recently sourced the OGO™ from the USA.

WHY THE OGO™ WAS DESIGNED

As the world of RVs, Vans, Caravans, Camper Trailers, Tiny Homes, Sheds and other "off grid" locations grow, so does the need for an efficient and effective waterless toilet. Thus, OGO™ was born!

HOW IS THE OGO™ BETTER

While other composting toilets are limited in their capabilities, OGO™ has it all! It's smaller, sleeker, modern, and has a smaller footprint than other leading composting toilets.

We make everyday life easier!

Enjoy your **OGO™** for \$2,095 incl GST

WHAT'S IN THE BOX?

The OGO™ Toilet

Mounting Screws and Vent Hose

12v Power Cable and Compost Toilet Cleaner/
Stimulant (Spray Bottle)

Coir Peat Brick

8 Reasons for an OGO™ composting toilet!

1. Made for a mobile life

The OGO™ inspires everyone who loves independent living. Its' compact size can even fit a camper. They are designed to keep everything secure even in rough seas or off-road.

2. Simply more freedom of travel

While many campers have to look for a dump point for their chemical toilet, you can spend days or even weeks "off the track" - no problem! All waste can be disposed of easily in an environmentally friendly way.

3. Real toilet comfort wherever you are.

Whether in a camper, on a boat or in a Tiny House - the OGO™ offers comfort like at home. To ensure the proper composting of the waste occurs the urine and solids are separated by a cleverly designed trapdoor in the seat. This works well for both men and women.

4. Hygienic and easy to clean

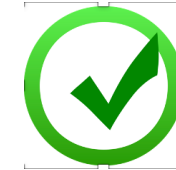

No chemicals! No smell! The smart design uses an automatic agitator to mix the solids with the highly absorbing coir peat. The substrate dries and composts odour-free. You only need to empty the urine container when necessary and clean the toilet with a spray bottle with some Compost Cleaner/Stimulant and a paper towel.

5. The environment is pleased

Because the urine is separated and emptied as needed, the solid waste can be disposed of by placing in a Bio-degradable bag & put in a rubbish bin or further composted. By using sustainable coir peat and eliminating any toilet chemicals, the OGO™ helps sustain an environmental balance.

6. Durable quality

To ensure mobile use, the OGO™ is made of easy-care plastic. The manufacturer provides a long-term warranty and should something happen to your toilet, you can get all the necessary spare parts from us.

7. Easy to install

When you order an OGO™ toilet, all the components you need are included. Clear instructions help you to install your new OGO™ in a space-saving and safe way. If you have any question we are available to assist!

8. A real eye-catcher

Who says a portable toilet can't also be a design feature? The new OGO™ impresses with its basic cubic shape and pure white sanitary look. This makes it a real eye-catcher on a stylish yacht or in a Tiny House.
